

Your partner for food safety

Detectable conveyor and process belts

Detectable conveyor belts

Chiorino DET® is a full range of food grade metal detectable products.

The exclusive DET® TPU belt is recognized in very **small particles** by the metal detectors used in food processing and packaging.

Chiorino DET® line guarantees a safest food production and prevents products

BENEFITS

Full compliance with food regulations Excellent resistance to bacteria proliferation and cleaning procedures

Guaranteed food safety

Highest detectability

No food contamination Waste reduction Prevent product recalls

Excellent flexibility

Ideal for knife edge

Superior resistance to cut, abrasion and aggressive fats and oils

Long service life

DET Superior detectability +300%

R&D comparison between Chiorino DET® line and average competitors shows that

the DET® line is far more detectable: + 300%.

A very small debris of DET® belt is recognized by the metal detector.

The prompt identification and removal of the contaminated product assures a safest food processing and packaging.

MINIMUM DETECTABLE PART

Based on R&D analysis run on the same metal detector. The Chiorino DET® particle recognized by metal detector is three times smaller than competitor's

Chiorino DET® **elastic belts** are successfuly used as **components** and **protection parts** in food processing.

Plastic accessories and components are widely used in food production lines, such as:

- · Lateral protections
- · Machinery sheets
- · Dough feeders coatings
- Wheels
- · Skids coverings etc.

They're often **not visibile** or **not easily reachable** by the operator, as in the aerial conveyors, in closed structure frames or in case of poor layout accessibility.

Chiorino DET® protections assure

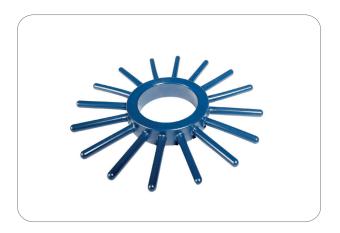

- Highest detectability
- Total food compliance.

Chiorino produces DET® customized components for particular processing needs, such as AC593 **Wheel blue DET** used for cheese spreading in pizza production.
